You have five days from the day you move into the rental property to thoroughly document the condition of the rental property on the provided move-in checklist. You must keep a copy for your personal records and provide Fetter Properties Management a copy via email, mail, or returning it to the office. The move in checklist will be used as a comparison to the move-out inspection at the conclusion of the lease to determine any tenant damages or wear and tear of the property. Documenting damage does not mean that these items will be repaired or replaced, but that the tenant will not be held responsible for such damage upon move-out.
